

Next Generation Sequencing

NGS Solutions for Virtually Any Project

Amplicon Sequencing

- Amplicon-EZ
- Short-read amplicons for >100bp
- Long-read amplicons for >500bp

RNA Sequencing

- Standard and strand-specific for mRNA and total RNA
- Small RNA
- Ultra-low input
- Iso-Seq
- High-throughput gene expression screening
- Single-cell RNA-Seq

Whole Genome Sequencing

- Short- and long-read whole genome sequencing
- Low-pass whole genome sequencing

Targeted Sequencing

- Whole exome
- Cancer and custom gene panels
- CRISPR validation assay

Clinical Sequencing

- CLIA whole genome and exome
- RUO assays in CLIA environment

Viral Genome Sequencing

- AAV, lentivirus, and more
- RNA and DNA viruses

Immunogenomics

- Bulk and single-cell immune repertoire profiling

Epigenomics

- Short- and long-read whole genome
- Methyl-Seq
- Single-cell and bulk ATAC-Seq
- ChIP-Seq

Metagenomics

- Whole genome
- 16S assay for bacterial ID
- ITS2 assay for fungal ID

Proteomics and Spatial Genomics

- Digital spatial profiling
- Olink® proteomics

Next Generation Sequencing

The Azenta Life Sciences Difference

- Experience processing over 100 sample types including complex, novel, and less-than-ideal samples.
- Continuous optimization of solutions through increased automation and platform offerings.
- One of the industry's highest on-time delivery rates with over 92% of projects delivered on time.
- Expertise sequencing a variety of organisms with over 200 species sequenced.

Quality Through Every Step

Sample Sourcing

Access to an extensive biorepository

Design

Free consultations from expert scientists

Extraction

Myriad of sample types accepted

Library Prep

Automated processes improve reproducibility

Sequencing

Utilizing the latest platforms and technologies

Bioinformatics

Customizable offerings based on your needs

Flexible Package Options

Though our turnaround times already exceed industry standards, we understand that sometimes you need results quicker. We offer flexible service packages to accommodate your project deadlines with each offering the same high-quality data you know and trust from Azenta Life Sciences.

Value

Come in under budget with our most economical pricing

Preferred

Get results quickly without breaking the bank

Express

Meet tight deadlines with our industry-leading turnaround time

Lightning

Receive results in lightning speed for select RNA sequencing and sequencing only services

NGS Platforms
